SVM Multi-Classs Classification

1. One v/s All

SVM Multi-Classs Classification

1. One v/s All

$$\left. \begin{array}{l} \text{Blue (+1) v/s All (-1) : } \overline{w} \cdot \overline{x}_{test} + b = 0.8 \\ \text{Yellow (+1) v/s All (-1) : } \overline{w} \cdot \overline{x}_{test} + b = 0.6 \\ \text{Red (+1) v/s All (-1) : } \overline{w} \cdot \overline{x}_{test} + b = -0.2 \end{array} \right\} \text{argmax} = \text{Blue}$$

1. One v/s One

SVM Multi-Classs Classification

1. One v/s One

Majority = Blue

SVM Multi-Classs Classification

1. One v/s One

1 Blue v/s Yellow \rightarrow Blue

Majority = Blue

SVM Multi-Classs Classification

1. One v/s One

1 Blue v/s Yellow \rightarrow Blue

2 Yellow v/s Red \rightarrow Red

Majority = Blue

SVM Multi-Classs Classification

1. One v/s One

- 1 Blue v/s Yellow \rightarrow Blue
- 2 Yellow v/s Red \rightarrow Red
- 3 Red v/s Blue \rightarrow Blue

Majority = Blue

Support Vector Regression

Hard Margin or ϵ -SVR

$$\hat{y}(x) = \bar{w} \cdot \bar{x} + b$$
